

Case Study

John Riordan – Dublin

I have been involved with dogs for more than 50 years and more recently joined by my daughter Alice when we discovered the sport of IPO. We travelled to Germany where we purchased our first working Female German Shepherd. It was the best decision ever made by us and what we purchased has developed into a truly magnificent specimen. Currently in training for her IPO1 having already achieved her BH under acclaimed Dutch Judge Toine Jonkers.

We also purchased a Rottweiler female with true German working bloodlines who has also achieved BH status and on her way to IPO1.

We believe that the drive and condition borne by all our Dogs is thanks to the high quality content of Feedwell that allows our dogs to perform at optimal level.

We also feed our brood females when in pup on the high protein contained in Feedwell Sport to ensure their energy levels are maintained while whelping. This food is maintained and the puppies are slowly introduced to Feedwell Puppy to get them off to a good start in life.

We at Lishmar Working Dogs would certainly recommend any dog owner to use this high quality product whether they are pets or sport dogs competing at any level.
